Mr. Michael Decter,
Deputy Minister of Health,
10th fl - 80 Grosvenor,
Toronto, Ontario. M7A 1R3

12 March 1992

Dear Mr. Decter,

Please find attached a list of central nervous system symptoms of environmental sensitivities from the appendices of the Thomson report.

We would appreciate it greatly if you would look at the list, and again reflect on the fact that staff under your direction are causing persons whose central nervous system dysfunction results from sensitivities to experience these horrors on a daily basis.

Responsible authorities, including yourself and the Ontario government in general, are ignoring recommendations from several eminent authorities, including the federal health department, that sensitivities be ruled out so that members of this group are not subjected to such ghastly abuse.

I remain ashamed and humiliated that you continue to allow this abuse.

Sincerely,

Chris Brown
